Initial Site Assessment

Humboldt Bay Trail South

Humboldt County Department of Public Works

GHD | 718 Third Street, Eureka, California

11110166 | 04 | November 2017

Revision 4

Executive Summary

This Initial Site Assessment (ISA) was conducted for the Humboldt County Public Works Department Humboldt Bay Trail South Project (Project). The Project is intended to provide non-motorized (primarily pedestrian and bike) transportation and recreational access connecting the City of Eureka Waterfront Trail to Humboldt Bay Trail North via a California Department of Transportation (Caltrans) Class I multi-use trail. The Project will connect to the existing Eureka Waterfront Trail, starting at X Street in Eureka along the North Coast Railroad Authority (NCRA) railroad transportation corridor and will continue north towards Bracut Industrial Park. In October 2017, the Project was altered to include a 25-foot wide area east of the existing Humboldt Bay Trail North/Arcata Rail-with-Trail. A Project location map is provided as Figure 1.

The Project is generally on the west/north side of US Highway 101 and on the south/east side of the NCRA railroad corridor along the northeast shoreline of Humboldt Bay. The majority of the Humboldt Bay Trail South project is proposed to be located between US Highway 101 and the NCRA railroad corridor. At the Eureka Slough crossing, the trail is expected to cooperatively occupy the NCRA bridge and portions of the adjacent rail prism. To the north, the trail will be aligned along the perimeter of the California Redwood Company (CRC) property and at the northeast end of the Project, the trail will be aligned in front of the Bracut Industrial Park. The northern extent of the trail will include the eastern edge of the southern portion of the Humboldt Bay Trail North/Arcata Rail-with-Trail for a cable barrier.

For ease of reference, the Humboldt Bay Trail South project is divided into nine distinct segments arranged from south to north. In areas of complex intersections and water crossings, the segments are broken into sub-segments. The 20-foot wide eastern edge of the Humboldt Bay Trail North/Arcata Rail-with-Trail that was added to the Project in October 2017 was not assigned a Project segment. The segments and the portion of Humboldt Bay Trail North/Arcata Rail-with-Trail included in the Project are identified on Figure 1.

- Segment 1a: This segment includes a short section of the Eureka Waterfront Trail, beginning at Y Street in Eureka and ending at the bridge that crosses Eureka Slough.
- Segment 2: This segment includes the existing railroad bridge over the Eureka Slough.
- Segments 3a, 3b, 4a, and 4b: Segments 3a and 4a are within the NCRA right of way south of the tracks and Segments 3b and 4b are between the NCRA right of way and the highway. These segments span the section between Eureka Slough and the CRC property.
- Segments 5 and 6: These segments follow the perimeter levee around the CRC facility property. Segment 6 includes the proposed bay crossing.
- Segment 7: This segment includes the north Eucalyptus area.
- Segments 8 and 9: These segments include areas north of the Eucalyptus grove to the north end of the Bracut Industrial Park property.

Draft Document – For Discussion Only – Final Version May Differ From Draft

- Humboldt Bay Trail North/Arcata Rail-with-Trail: This portion of the Project includes the existing Humboldt Bay Trail North/Arcata Rail-with-Trail from its southern terminus north of the Bracut Industrial Park to the southern extent of South G Street in Arcata.

GHD Map Identification (ID) Numbers, sites of interest, and features observed during the site reconnaissance are presented on Figures 2-1 through 2-5.

The purpose of this ISA was to identify areas of potentially impacted soil and/or groundwater along the Project alignment that may require special handling and disposal during construction or could pose a health exposure risk to construction workers. The results of this ISA can be utilized to minimize potential construction schedule delays and contractor change orders by facilitating the necessary planning and coordinating with regulatory agencies, disposal facilities, and/or responsible parties prior to construction. Measures include protocols to reduce exposure to site workers from impacted soil and/or groundwater, offsite disposal (if necessary), and preparation of a Construction Soil and Groundwater Management Plan (SGMP) which should be utilized to proactively manage potentially impacted soil and groundwater within the Project segments.

This ISA identified several properties presented in Table A (below) where potentially impacted soil and/or groundwater may be encountered during construction activities. A summary discussion of potential construction impacts by site is included on Table 1 (attached).

TABLE A: Sites of Interest and Hazard Ranks

Site	Hazard Rank	GHD Map ID
North Coast Railroad Authority Corridor	3	1
Pepsi Cola Bottling Company	2	2
Target	2	3
APN 002-231-012	3	4
Former Redwood Oil Bulk Plant	2	5
California Redwood Company	2	6
Bracut Industrial Park	3	7
Highway 101	3	'---

APN- Assessor's Parcel Number
Map ID- GHD assigned site identification number

Sites where impacted soil and groundwater may affect construction activities were given Hazard Ranks of one, two, three, and four and are identified in Table 1 and Figures 2-1 through 2-5. Hazard rank definitions are included in Section 1.2.1 of this ISA. Potential impacts to construction are described in Section 8. Conclusions from the ISA are presented in Section 9. Pre-construction soil borings and preparation of a Construction SGMP to proactively manage potentially impacted soil and groundwater are recommended in order to characterize soil and groundwater quality within the Project segments.

Draft Document – For Discussion Only – Final Version May Differ From Draft

1. Introduction

1.1 Project Description

This Initial Site Assessment (ISA) was conducted for the Humboldt County Public Works Department Humboldt Bay Trail South Project (Project). The Project is intended to provide non-motorized (primarily pedestrian and bike) transportation and recreational access connecting the City of Eureka Waterfront Trail to Humboldt Bay Trail North via a California Department of Transportation (Caltrans) Class I multi-use trail. The Project will connect to the existing Eureka Waterfront Trail, starting at X Street in Eureka along the North Coast Railroad Authority (NCRA) railroad transportation corridor, will continue north towards Bracut Industrial Park and includes the eastern edge of the Humboldt Trail North/Arcata Rail-with-Trail to approximately the southern extent of G Street in Arcata or a proposed cable barrier. A Project location map is provided as Figure 1.

The study area is generally located between the cities of Eureka and Arcata in Humboldt County, California. The project extends from X Street in Eureka generally to the Bracut Industrial Center and includes the eastern edge of the Humboldt Trail North/Arcata Rail-with-Trail to approximately the southern extent of G Street in Arcata (south of the City of Arcata) (Figure 1). With limited exceptions, the project study area is entirely between US Highway 101 and the NCRA railroad prism. Generally, the project study area is on the west/north side of US Highway 101 and on the south/east side of the NCRA railroad corridor. The city boundary of the City of Eureka runs through the center of the study area. Approximately 40 percent of the study area falls within the boundaries of the City of Eureka, while the remaining 60 percent of the study area falls within unincorporated Humboldt County. The Eureka Slough is a significant water body that bisects the study area.

The Project is generally on the west/north side of US Highway 101 and on the south/east side of the railroad along the northeast shoreline of Humboldt Bay. The majority of the Humboldt Bay Trail South project is proposed to be located between the US Highway 101 and NCRA railroad corridor. At the Eureka Slough crossing, the trail is expected to cooperatively occupy the NCRA bridge and portions of the adjacent rail prism. To the north, the trail will be aligned along the perimeter of the California Redwood Company (CRC) site and at the northeast end of the Project, the trail will be aligned in front of the Bracut Industrial Park.

For ease of reference, the Humboldt Bay Trail South project is divided into nine distinct segments arranged from south to north. In areas of complex intersections and water crossings, the segments are broken into sub-segments. The 20-foot wide eastern edge of the Humboldt Bay Trail North/Arcata Rail-with-Trail that was added to the Project in October 2017 was not assigned a Project segment. The segments and the portion of Humboldt Bay Trail North/Arcata Rail-with-Trail included in the Project are identified on Figure 1.

- Segment 1a: This segment includes a short section of the Eureka Waterfront Trail, beginning at Y Street in Eureka and ending at the bridge that crosses Eureka Slough.
- Segment 2: This segment includes the existing railroad bridge over the Eureka Slough.

- Segments 3a, 3b, 4a, and 4b: Segments 3a and 4a are within the NCRA right of way south of the tracks and Segments 3b and 4b are between the NCRA right of way and the highway. These segments span the section between Eureka Slough and the CRC property.
- Segments 5 and 6: These segments follow the perimeter levee around the CRC facility property. Segment 6 includes the proposed bay crossing.
- Segment 7: This segment includes the north Eucalyptus area.
- Segments 8 and 9: These segments include areas north of the Eucalyptus grove to the north end of the Bracut Industrial Park property.
- Humboldt Bay Trail North/Arcata Rail-with-Trail: This portion of the Project includes the existing Humboldt Bay Trail North/Arcata Rail-with-Trail from its southern terminus north of the Bracut Industrial Park to the southern extent of South G Street in Arcata.

Site reconnaissance of the Project segments was completed on May 18, 2017 and October 4, 2017. Site reconnaissance photographs are included in Appendix A. In the interest of clarity, GHD assigned map identification numbers (Map ID-X) to the sites of interest within the Project alignment. GHD Map ID numbers start in the southernmost portion of the Project alignment in Segment 1a. GHD Map Identification (ID) Numbers, sites of interest, and features observed during the site reconnaissance are presented on Figures 2-1 through 2-5.

The purpose of this ISA was to identify areas of potentially impacted soil and/or groundwater along the Project segments that may require special handling and disposal during construction or could pose a health exposure risk to construction workers. This ISA identified several properties where potentially impacted soil and/or groundwater may be encountered. These sites were given a Hazard Rank of two or three and are identified in Tables A (embedded within document) and 1 (attached) and Figures 2-1 through 2-5. Hazard rank definitions are included in Section 1.2.1 of this report.

1.2 Initial Site Assessment Methodology

This ISA was completed in general conformance with the American Society of Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* 1527-13 and the California Department of Transportation (Caltrans), *Initial Site Assessment* (Standard Environmental Reference, Volume 1, Chapter 10). Interviews were not conducted with current or past property owners, tenants, or occupants of the properties located within the Project alignment and constitutes a deviation from the ASTM and Caltrans standards.

The ISA included reviewing government records for properties within one-eighth (1/8) of a mile (660 feet) of the Project alignment boundaries that may have potential for environmental concern during construction. The basis for the records review was a government database search conducted by Environmental Data Resources Inc. (EDR). EDR's reports and study area maps are included in Appendix B.

The EDR Report identified sites that government regulatory agencies have reported as having environmental concerns, such as releases of contaminants to the soil and/or groundwater, underground storage tanks (USTs) or use of hazardous materials. GHD further researched listed

sites that have the potential to affect the Project by reviewing available records on the State Water Resources Control Board (SWRCB) GeoTracker Website and interviews of Humboldt County Division of Environmental Health (HCDEH) staff.

During the course of this ISA, GHD conducted a field reconnaissance within the Project alignment and private properties where access was granted to determine if potential sites of concern existed which were not listed in the EDR Report. The Project alignment reconnaissance was also performed to verify the locations of listed sites. Aerial photographs from 1956 to 2014 were provided by EDR and reviewed during the completion of this ISA. EDR aerial photographs are included in Appendix C. Historical Sanborn Maps from 1900 to 1988 were reviewed during the completion of this ISA and are included in Appendix D. Sanborn Maps were not available for the Humboldt Bay Trail North/Arcata Rail-with-Trail portion of the Project alignment. A copy of the certification of an unmapped property for this portion of the Humboldt Bay Trail North/Arcata Rail-with-Trail portion of the Project alignment is included in Appendix D. Historical topographic maps from 1933 to 2012 were provided by EDR and reviewed during the completion of this ISA. EDR historical topographic maps are included in Appendix E.

1.2.1 Hazard Ranking

A number of potentially impacted sites were identified in the EDR Report and are listed in Table A and Table 1. File reviews were conducted for those sites considered to potentially impact the Project.

Visual observations were made of the Project alignment for gasoline service stations or other potentially impacted sites that were not listed in the EDR Report. Gasoline service stations are considered potentially impacted whether or not they are associated with known leaking USTs since gasoline stations are typically associated with petroleum hydrocarbons, benzene, toluene, ethylbenzene, and total xylenes (BTEX), and methyl tert-butyl ether (MTBE) releases to the environment. Evidence of former or current gas stations not listed in the EDR report was not observed during the site reconnaissance on May 18, 2017 and October 4, 2017.

Based on the data available, each of the sites that could potentially impact the Project has been assigned a Hazard Rank which is defined as follows:

Hazard Rank 1: A site that will likely affect Project construction. Contamination of soil and/or groundwater is confirmed to be within the Project alignment.

Hazard Rank 2: A site with the potential to affect the Project, either because of the presence of contamination that may likely migrate into the Project area or because the extent of contamination is unknown.

Hazard Rank 3: A site that is not known to be contaminated, but due to current or historical use could possibly have contamination that could affect Project construction.

Hazard Rank 4: A site that has little or no potential to affect the Project.

2. General Characteristics of the Project Alignment and Vicinity

Nine Project segments are discussed as individual areas throughout this ISA. A location map is presented as Figure 1. Figures 2-1 through 2-5 show sites of interest and features observed within the Project area. The nine Project segments are described in Section 1.1 of this ISA:

- Segment 1a: This segment includes a short section of the Eureka Waterfront Trail, beginning at Y Street in Eureka and ending at the bridge that crosses Eureka Slough.
- Segment 2: This segment includes the existing railroad bridge over the Eureka Slough.
- Segments 3a, 3b, 4a, and 4b: Segments 3a and 4a are within the NCRA right of way south of the tracks and Segments 3b and 4b are between the NCRA right of way and the highway. These segments span the section between Eureka Slough and the CRC property.
- Segments 5 and 6: These segments follow the perimeter levee around the CRC facility property. Segment 6 includes the proposed bay crossing.
- Segment 7: This segment includes the north Eucalyptus area.
- Segments 8 and 9: These segments include areas north of the Eucalyptus grove to the north end of the Bracut Industrial Park property and include the east side of the Humboldt Bay Trail North/Arcata Rail-with-Trail.
- Humboldt Bay Trail North/Arcata Rail-with-Trail: This portion of the Project includes the existing Humboldt Bay Trail North/Arcata Rail-with-Trail from its southern terminus north of the Bracut Industrial Park to the southern extent of South G Street in Arcata.

General published Project geology and general groundwater characteristics at the Project Study Area are discussed in this section.

2.1 Project Alignment Geology

According to the 2010 Geologic Map of California (Jennings and Bryant), the site is mapped as Quaternary deposits (Qoa) which consist of older alluvium, lake, playa and terrace deposits. Regional geology is likely influenced by seismic activity as a result of the relatively close proximity of the Mendocino Triple Junction to the Project. A spur of the Little Salmon Fault is located approximately five miles south of the Project as mapped in the Fault Activity Map for California (Jennings and Bryant, 2012). The Little Salmon Fault is mapped as a recent (Holocene era), low angle thrust fault in which displacement occurred within approximately the last 11,700 years. Review of historical aerial photographs indicates that the majority of the Project was formerly Humboldt Bay tidelands and bay margin sediments. Evidence of various stages of filling within the Project segments was observed on historical aerial photographs and Sanborn Maps reviewed for this ISA.

2.2 Groundwater Elevation and Flow Direction

Based on review of information available on the SWRCB Geotracker website, a shallow, unconfined water-bearing unit would be encountered as shallow as less than one foot below ground surface (bgs) and extends to a depth of approximately ten feet bgs. Groundwater in the Project vicinity has been reported to flow towards Humboldt Bay and Arcata Bay (Figure 1) and is influenced by the variable local topography, tidal fluxes, drainage channels, and sloughs. It is anticipated that groundwater will be encountered at very shallow depths during execution of the Project, particularly in spring and early summer.

3. Site Reconnaissance

The site reconnaissance was completed on May 18, 2017 and October 4, 2017, and was completed by walking the Project segments. Discussion of site reconnaissance observations is presented in this section by Project segment. Map identification numbers presented on Figures 2-1 through 2-5 are referred to herein. Site reconnaissance photographs are included as Appendix A. Evidence of stockpiles, former excavation areas, location of former ASTs and USTs and teepee burners, and areas of stressed vegetation were not observed during the May and October 2017 site reconnaissance. With the exception of creosote observed on the Northwestern Pacific Railroad rail ties, evidence of soil staining was not observed during the May and October 2017 site reconnaissance. See Figures 2-4 and 2-5.

3.1 Segment 1A

This segment includes a short section of the Eureka Waterfront Trail, beginning at Y Street in Eureka and ending at the former Northwestern Pacific Railroad bridge that crosses Eureka Slough. The NCRA corridor tracks are still present on an elevated prism that appears to consist of aggregate base and gravel. Creosote stained railroad ties were observed throughout the NCRA rail corridor. The surrounding vegetation appears regularly maintained. Wind-blown trash was observed throughout this segment of the Project alignment.

Areas of varying vegetation are present in the area immediately north of the railroad tracks and the area is undeveloped (Assessor's Parcel Number [APN] Map ID-4, Figure 2-1). Recent vegetation clearing completed for the City of Eureka Waterfront Trail construction was observed in the area north of the NCRA railroad corridor. The area south and east of Segment 1A is developed with primarily commercial properties (Map ID-2 and Map ID-3, Figure 2-1). Pepsi-Cola Bottling Company (Pepsi, Map ID-2) occupies the property located immediately south of this Project segment, along the North Bank of the Target Slough, and includes a large warehouse and office building and associated paved parking areas. With the exception of the area along the eastern property boundary, the perimeter of the Pepsi property is surrounded by a chain link fence. Large pieces of concrete and wood debris were observed along the northern bank of the Target slough. Residential properties are located along X and Y Streets.

3.2 Segments 2 through 4

Segments 2 through 4 are located along the NCRA railroad corridor (Map ID-1, Figures 2-1 and 2-2). Segment 2 includes the existing railroad bridge over the Eureka Slough and Segments 3 and 4 are within the NCRA right of way (ROW) south of the tracks and between the NCRA ROW and US US Highway 101. Segments 2 through 4 span the section between Eureka Slough and the CRC property. The NCRA corridor tracks are still present on an elevated prism that appears to consist of aggregate base and gravel. Creosote stained railroad ties were observed throughout the NCRA rail corridor. Several transient encampments were observed built within the densert vegetation along the railroad corridor during the May 2017 site reconnaissance. An area of household waste dumping was present in the vicinity of the transient encampments. Windblown trash was noted in several areas of this Project segment.

Segment 2 crosses the Eureka Slough with tidal flats and Humboldt Bay to the north. US Highway 101 is located along the southern border of Segments 2 through 4. Humboldt Bay and its associated tidal flats are located north of Segments 2 through 4. Areas of rip rap were located immediately north of the NCRA ROW along its northern boundary with Humboldt Bay.

3.3 Segments 5 and 6

Segments 5 and 6 follow the perimeter levee around the CRC facility property (Map ID-6, Figure 2-2). Segments 5 and 6 are bound to the north by Humboldt Bay and to the south by US Highway 101. The NCRA corridor tracks are still present on an elevated prism that appears to consist of aggregate base and gravel along the eastern boundary of the CRC property. Creosote stained railroad ties were observed throughout the NCRA rail corridor. The northern boundary of the CRC property with Humboldt Bay is bound by a levee with significant armoring. The top of the levee is generally greater than ten feet wide and appears to be constructed with rip rap material. The CRC property is occupied by various commercial tenants. At the time of the May 2017 site reconnaissance, the majority of the CRC property was utilized as a warehouse facility for local soil companies.

3.4 Segment 7

This segment includes the north Eucalyptus area located immediately west of US Highway 101. A deep ditch with steep sides falls in the center of this area. Segment 7 is generally within the NCRA ROW between Humboldt Bay and US Highway 101. The NCRA corridor tracks are still present on an elevated prism that appears to consist of aggregate base and gravel. Creosote stained railroad ties were observed throughout the NCRA rail corridor. Windblown trash was noted in several areas of this Project segment.

3.5 Segments 8 and 9

Segments 8 and 9 include areas north of the Eucalyptus grove located along the west side of US Highway 101 to the north end of the Bracut Industrial Park property. Segments 8 and 9 are generally within the NCRA ROW between Humboldt Bay and US Highway 101. The NCRA corridor tracks are still present on an elevated prism that appears to consist of aggregate base and gravel. Creosote stained railroad ties were observed throughout the NCRA rail corridor.

Segment 9 is located along the northern and eastern borders of the Bracut Industrial Park. At the time of the May and October 2017 site reconnaissance, several of the buildings located on the Bracut property were occupied by commercial businesses.

3.6 Humboldt Bay Trail North/Arcata Rail-with-Trail

The portion of the Humboldt Bay Trail North/Arcata Rail-with-Trail was under construction during the October 2017 site reconnaissance, with the trail being constructed along the western edge of Highway 101 South. The portion of the Project alignment along the eastern side of this portion of the trail is undeveloped with sparse vegetation. Some vegetation has been disturbed as a result of trail construction.

4. Historical Aerial Photographs

Historical aerial photographs were reviewed as part of this ISA for the Project segments and surrounding areas for the years 1941 (Humboldt Bay Trail North/Arcata Rail-with-Trail only), 1954 (Humboldt Bay Trail North/Arcata Rail-with-Trail only), 1956, 1972, 1983, 1993, 1998, 2005, 2010, and 2014 (Appendix C). The photographs are at a scale of one inch equals 1,000 feet (1:12,000). The photograph from 1972 is of poor quality and features were obscured.

Discussion of the features observed on the historical aerial photographs is presented by Project segment. Map identification numbers are presented on Figures 2-1 through 2-5 and are referred to herein. The following subsections present a summary of the findings:

4.1 Segment 1A

1956: The NCRA corridor and Eureka Slough bridge crossing are visible in their present day locations (Map ID 1, Figure 2-1). Residential development of the surrounding properties south and southwest of the railroad corridor is visible.

1972: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1983: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1993: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1998: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2005: This aerial photograph appears similar to the previous photograph, with the exception that the current building and associated parking and landscaped areas located on the Target property are visible in their present day locations. Features within this Project segment appear unchanged.

2010: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2014: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

4.2 Segments 2 through 4

1956: The NCRA corridor is visible in its current location (Map ID 1, Figures 2-1 and 2-2). Humboldt Bay is visible in this photograph and appears in its current configuration. US Highway 101 is visible in its present day configuration. Limited development of the properties located south of the Project, on the east side of US Highway 101, are shown as developed. Murray Field Airport is shown and the runway associated with the airport is visible.

1972: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1983: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1993: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1998: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2005: This photograph is similar to the previous photograph, with the exception of increased development of the properties located south of the Project segment on the east side of US Highway 101. Features within this Project segment appear unchanged.

2010: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2014: This aerial photograph appears similar to the previous photograph.

4.3 Segments 5 and 6

1956: The NCRA corridor and US Highway 101 are visible in their present day locations (Map ID 1, Figures 2-1 and 2-2). Humboldt Bay is visible in this photograph and appears in its current configuration. The CRC property (Map ID-6, Figure 2-2) is developed with six buildings located in the northern and central portions of the property. A teepee burner is located in the central portion of the CRC property along the eastern property line. The northern portion of the CRC property is occupied by a log deck.

1972: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged, with the exception that the teepee burner located in the east central portion of the CRC property is no longer visible.

1983: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1993: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1998: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2005: This photograph is similar to the previous photograph, with the exception of increased development of the properties located south of the Project segment on the east side of US Highway 101. Features within this Project segment appear unchanged.

2010: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2012: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2014: This aerial photograph appears similar to the previous photograph.

4.4 Segment 7

1956: The NCRA corridor and US Highway 101 are visible in their present day locations (Map ID-1, Figure 2-3). Humboldt Bay is visible in this photograph and appears in its current configuration.

1972: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1983: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1993: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1998: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2005: This photograph is similar to the previous photograph, with the exception of increased development of the properties located south of the Project segment on the east side of US Highway 101. Features within this Project segment appear unchanged.

2010: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2012: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2014: This aerial photograph appears similar to the previous photograph.

4.5 Segments 8 and 9

1956: The NCRA corridor is visible in its present day location along the eastern boundary of the Bracut Industrial Park property (Map ID 1, Figures 2-1 through 2-5). Humboldt Bay is visible in this photograph and appears in its present day configuration. US Highway 101 is visible in its current configuration and is located along the eastern boundary of this Project segment. The Bracut

Industrial Park property (Map ID-7, Figure 2-4) is developed with two buildings located in the northern portion of the property. Log decks occupy the southern portion of the Bracut Industrial Park property. A teepee burner is located in the northeastern corner of the Bracut Industrial Park property along the eastern property line and a second is present immediately south of the southern-most building. The western portion of the Bracut Industrial Park property is surrounded by a breakwater structure in the location of the present day berm located on the Bracut Industrial Park property. The area between the breakwater and the present day central portion of the Bracut Industrial Park property is occupied by Humboldt Bay.

1972: The western portion of the Bracut Industrial Park property east of the breakwater appears filled and several stockpiles appear in the northwestern corner of the property. Three additional buildings are shown in the southern portion of the Bracut Industrial Park property and the southern teepee burner is no longer visible. The City of Arcata waste wastewater pond located on the west side of South G Street is visible. With the exception of the changes noted, the remaining features in this Project segment appear unchanged.

1983: The two buildings, log deck, and teepee burner located in the northern portion of the Bracut Industrial Park property are no longer visible. With the exception of the changes noted, the remaining features in this Project segment appear unchanged.

1993: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1998: This photograph is similar to the previous photograph, with the exception that the northern portion of the Bracut Industrial Park property is vegetated. Features within this Project segment appear unchanged.

2005: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2010: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2012: This aerial photograph appears similar to the previous photograph.

2014: This aerial photograph appears similar to the previous photograph.

4.6 Humboldt Bay Trail North/Arcata Rail-with-Trail

1941: The NCRA corridor is visible in its present day location along the eastern boundary of the present day Project alignment of the Humboldt Bay Trail North/Arcata Rail-with-Trail (Map ID 1, Figures 2-1 through 2-5). Humboldt Bay is visible in this photograph and generally appears in its present day configuration. US Highway 101 and South G Street are visible in their current configurations and are located along the eastern and western boundaries, respectively, of this Project segment.

1954: This photograph is similar to the previous photograph, with the exception that the eastern margins of Humboldt Bay appear filled. Features within this Project segment appear unchanged.

1956: Humboldt Bay is visible in this photograph and appears in its present day configuration. US Highway 101 is visible in its current configuration and is located along the eastern boundary of this Project segment.

1972: The City of Arcata waste wastewater pond located on the west side of South G Street is visible. With the exception of the changes noted, the remaining features in this Project segment appear unchanged.

1983: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1993: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

1998: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2005: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2010: This photograph is similar to the previous photograph. Features within this Project segment appear unchanged.

2012: This aerial photograph appears similar to the previous photograph.

2014: This aerial photograph appears similar to the previous photograph.

5. Sanborn Maps

Historical Sanborn Maps were reviewed as part of this ISA for portions of the Project segments (where coverage was available) and surrounding areas for the years 1889, 1892, 1900, 1920, 1949, 1955, 1957, 1958, 1964, 1967, and 1988. Sanborn Maps were available for the central or northern portion of the northernmost portion of the Project alignment (Segments 3 through 8 and Humboldt Bay Trail North/Arcata Rail-with-Trail). Sanborn maps provided by EDR and a certificate of an unmapped property (Segment 9) are included in Appendix D. Discussion of the features observed on the Sanborn Maps is divided into the nine Project segments. Map identification numbers presented on Figures 2-1 through 2-5 and are referred to herein. The following subsections present a summary of the features mapped by Project segment:

5.1 Segment 1A and Segment 2

Sanborn Maps were available for portions of Segment 1A for the years 1900, 1920, 1958, 1964, 1967, 1969, and 1988. Sanborn mapping identifies the properties located south of Segment 1A as residential dwellings. With the exception of the 1900 Sanborn Map where the area is identified as 'Tidal Flats,' the Northwestern Pacific Railroad (Map ID-1, Figure 2-1) is shown as occupying the current NCRA railroad corridor in the Sanborn maps provided by EDR. The railroad corridor is shown in its present day location in the maps. The Eureka Slough bridge (Segment 2) railroad crossing is depicted on the 1988 Sanborn Map in its approximate present day location and

configuration. A small building is shown immediately north of the Eureka Slough railroad bridge in the 1988 map.

Sanborn mapping identifies the properties located south of Segment 1A as residential dwellings. The property located at the corner of 1st and X Streets (Map ID-5, Figure 2-1) is identified as a 'Box Factory' with a storage house. The Sanborn symbol for a storage tank is shown immediately south of the building located on this property. The features depicted on this property do not change in subsequent Sanborn maps with two exceptions, the building is labelled 'Cont'rs Storage' in the 1967 and 1988 maps and labelled Lumber Storage in the 1988 map. Individual features associated with the building on this property are not identified in the 1988 Sanborn map.

5.2 Segments 3 through 8

Sanborn Maps were not available for these Project segments.

5.3 Segment 9

Sanborn maps were available for the Bracut Industrial Park property (Map ID-7, Figure 2-4) for the years 1957, 1958, 1964, 1967, 1969, and 1988. Based on review of the available Sanborn maps for the Bracut Industrial Park property, the features shown on the 1957 map are unchanged in the subsequent map years provided by EDR. The Sanborn maps identify the Bracut Industrial Park property as occupied by the Arcata Redwood Company's Planing Mill and Lumber Yard. The Arcata Redwood Company's mill included areas of dry air storage in the northern and southern portions of the site. Numerous buildings are depicted on the property and include; a dressed lumber shed, a planing mill, several dry lumber shed storage buildings, a steam dry kiln area, a cooling shed, a sorting shed, and an edge and end glue plant. The teepee burner identified in the central portion of the Bracut Industrial Park property in the historical aerials is identified in the Sanborn maps as a 60-foot high steel refuse burner. The Sanborn maps identify storage tanks in the northwestern-most corner of the property and in the south-central portion of the property. A 500,000-gallon capacity reservoir is located in the central portion of the Bracut Industrial Park property.

5.4 Humboldt Bay Trail North/Arcata Rail-with-Trail

Sanborn Maps were not available for the Humboldt Bay Trail North/Arcata Rail-with-Trail portion of the Project.

6. Historical Topographic Maps

Historical topographic maps were reviewed as part of this ISA for the Project segments and surrounding areas for the years 1933, 1942, 1947, 1951, 1958, 1959, 1972, and 2012 (Appendix E).

Discussion of the features observed on the historical topographic maps is presented by Project segment. Map identification numbers are presented on Figures 2-1 through 2-5 and are referred to herein. The following subsections present a summary of the findings:

6.1 Segment 1A

1933: The Western Pacific Railroad corridor is depicted in its present day configuration. Three buildings are depicted in the area immediately north of the railroad bridge crossing across the Eureka Slough. A building is depicted in the southernmost area of the Project alignment at the intersection of 1st and X Streets. US Highway 101 is developed and shown in its present day configuration.

1942: This topographic map is similar to the previous map. Features within this Project segment appear unchanged, with the exception that the railroad corridor is identified as occupied by the Northwestern Pacific Railroad.

1947: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1951: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1958/1959: This topographic map is similar to the previous map. Features within this Project segment appear unchanged, with the exception that two of the three buildings depicted immediately north of the south side of the railroad bridge crossing the Eureka Slough are no longer shown.

1972: This topographic map is similar to the previous map. Features within this Project segment appear unchanged, with the exception of the property located south of the railroad corridor, which is identified as occupied by Montgomery Ward's.

2012: Individual features of properties are not identified on this topographic map.

6.2 Segments 2 through 4

1933: The Western Pacific Railroad corridor is depicted in its present day configuration. The railroad bridge crossing of Eureka Slough and the Eureka Slough are identified and shown in their present day configurations. US Highway 101 is developed and shown in its present day configuration. Development of the properties located east of the Project alignment, across Highway 101, are undeveloped. Humboldt Bay is shown in its current configuration.

1942: This topographic map is similar to the previous map. Features within this Project segment appear unchanged, with the exception that the railroad corridor is identified as occupied by the Northwestern Pacific Railroad.

1947: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1951: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1958/1959: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1972: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

2012: Individual features of properties are not identified on this topographic map.

6.3 Segments 5 and 6

1933: The Western Pacific Railroad corridor is depicted in its present day configuration. US Highway 101 is developed and shown in its present day configuration. Humboldt Bay is shown in its current configuration. The CRC property (Map ID-6) is identified as a meadow.

1942: This topographic map is similar to the previous map. Features within this Project segment appear unchanged, with the exception that the railroad corridor is identified as occupied by the Northwestern Pacific Railroad.

1947: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1951: This topographic map is similar to the previous map, with the exception that the CRC property (Map ID-6, Figure 2-2) is shown as developed with five buildings in the northern portion of the site. Remaining features within this Project segment appear unchanged.

1958/1959: This topographic map is similar to the previous map, with the exception of two additional buildings depicted on the CRC property (Map ID-6). Features within this Project segment appear unchanged.

1972: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

2012: Individual features of properties are not identified on this topographic map.

6.4 Segments 7 through 9

1933: The Western Pacific Railroad corridor is depicted in its present day configuration. US Highway 101 is developed and shown in its present day configuration. Humboldt Bay is shown in its current configuration. This map is of poor quality and individual features are obscured. The Bracut Industrial Park property (Map ID-7, Figure 2-4) appears to be developed with at least two buildings.

1942: This topographic map is similar to the previous map. Features within this Project segment appear unchanged, with the exception that the railroad corridor is identified as occupied by the Northwestern Pacific Railroad.

1947: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1951: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1958/1959: This topographic map is similar to the previous map, with the exception of at least six buildings depicted on the CRC property (Map ID-6). Features within this Project segment appear unchanged.

1972: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

2012: Individual features of properties are not identified on this topographic map.

6.5 Humboldt Bay Trail North/Arcata Rail-with-Trail

1933: The Western Pacific Railroad corridor is depicted in its present day configuration. US Highway 101/Redwood Highway is developed and shown in its present day configuration. Humboldt Bay is shown in its current configuration.

1942: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1947: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1951: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

1959: This topographic map is similar to the previous map, with the exception that the City of Arcata sewage disposal facility and its associated oxidation pond has been developed along South G Street. Features within this Project segment appear unchanged.

1972: This topographic map is similar to the previous map. Features within this Project segment appear unchanged.

2012: Individual features of properties are not identified on this topographic map.

7. Sites of Interest

The high-ranking sites were searched/reviewed on the SWRCB Geotracker for depth to groundwater, identification of the extent of soil and groundwater impacts and a summary of regulatory history. Table 1 presents a list of identified sites along the Project alignment, with a summary of contaminants, groundwater elevation data (if available), and their assigned Hazard Rank based on the criteria described in Section 1.2.1.

The “EDR ID number” associated with each site corresponds to the EDR Maps (presented in Appendix B) and is independent of the GHD Map ID. Some EDR ID numbers have multiple sites associated with them due to the sites being located near each other. Some sites also have multiple EDR ID numbers, due to their being listed in the various databases searched. Several sites identified by EDR are incorrectly plotted on the EDR Map, and are actually outside the project area. The EDR report identified numerous additional sites along the Project alignment which are not discussed in this report because these sites were ranked too low to be of concern (Rank 4). Sites of

interest are shown on Figures 2-1 through 2-5. The detailed description of each rank is described in Section 1.2.1 of this ISA.

7.1 Hazard Rank 1

A site assigned a hazard rank 1 will likely affect Project construction. Contamination of soil and/or groundwater is confirmed to be located within the Project alignment. Sites assigned a hazard rank 1 were not identified within the Project segments.

7.2 Hazard Rank 2

A site assigned a hazard rank 2 has the potential to affect the Project, either because of the presence of contamination that may likely migrate into the Project area or because the extent of contamination is unknown. Five properties included within the Project were assigned a hazard rank of two and are further discussed in the following subsections.

7.2.1 Pepsi (Map ID-2)

The Pepsi site is located at 2433 Second Street and is further identified as NCRWQCB Case Number 1NHU351. This property is located immediately north of Target along the northern bank of the Target Slough. Based on information contained in the NCRWQCB case file and on the SWRCB Geotracker website, soil and groundwater quality was impacted by a release of petroleum hydrocarbons from a former above ground storage tank (AST) and associated piping utilized at the property. Soil, groundwater and surface water impacts in the vicinity of the former AST and associated piping were delineated and remediation activities were performed (soil excavation, in-situ bioremediation and sheet pile installation [along southeastern property boundary]) to address impacted soil, groundwater and surface water. The NCRWQCB approved No Further Action (NFA) for this case on December 19, 2011. A SGMP is on file with the NCRWQCB and indicates that residual soil and groundwater impacts are present in the central, southeastern and eastern portions of the Pepsi property.

Review of historical aerial photographs and observations during the site reconnaissance indicate that the Pepsi property was formerly tidal flats and has been filled with various materials (soil, concrete, wood and other miscellaneous construction/building debris). Research completed during preparation of this ISA did not identify the source of fill material in this portion of this Project segment and its origin is unknown. As the source of the fill materials is unknown and historical development of this parcel appears to be industrial, there is the potential for soil and groundwater impacts in the vicinity, and down-gradient of, fill materials on this property.

7.2.2 Target (Map ID-3)

The former Montgomery Wards/Target property (Map ID-3) is located at 2525 Fourth Street and is further identified as NCRWQCB Case Numbers 1THU887 and 1NHU887. This property includes the Existing Target Trail Project segment and is currently an active Target retail store. According to the information on file at the NCRWQCB, this site was developed in 1963 on vacant tidal land. Montgomery Wards, a retail store with automotive repair services formerly utilized this site for commercial operations. The former Montgomery Wards automotive shop included one waste oil

tank, five hydraulic hoists and one oil/water separator. Petroleum hydrocarbon impacts to soil and groundwater were identified in the north-central portion of this property (Map ID-3). The NCRWQCB concurred with NFA for the two cases on August 27, 2007.

Additional information present in the NCRWQCB file for this case documents a release of SVOCs including dioxins and furans in the eastern portion of the property, immediately west of the existing Target Trail. Information regarding the source of the SVOC impacted soil and evidence of delineation in the eastern direction (towards the Existing Target Trail Project segment) was not present in the NCRWQCB case files. SVOC impacted soil was remediated as a 'hot spot' excavation to the satisfaction of the NCRWQCB in 2005.

Information regarding soil and groundwater quality in the area of the existing Target Trail was not present in the NCRWQCB case file. As COCs were identified in the eastern portion of this property and the potential source of SVOCs in soil was not identified, there is the potential for impacted soil and groundwater to be present within this portion of the Project. Additionally, review of historical aerial photographs and observations during the site reconnaissance indicate that the northern and eastern portions of Map ID-4 were formerly tidal flats and have been filled with various materials (soil, concrete, wood and other miscellaneous construction/building debris). Research completed during preparation of this ISA did not identify the source of fill material in this portion of this Project segment and its origin is unknown. As the source of the fill materials is unknown and historical development of this parcel appears to be industrial, there is the potential for soil and groundwater impacts in the vicinity, and down-gradient of, fill materials on this property.

7.2.3 Former Redwood Oil Bulk Plant (Map ID-5)

The Former Redwood Oil Bulk Plant site is located at 105 X Street and is further identified as NCRWQCB Case Number 1NHU751. This property is located immediately south of the southern-most extent of the Project and abuts Segment 1A. Based on information available on the SWRCB Geotracker website, soil and groundwater quality was impacted by a release of petroleum hydrocarbons from former ASTs and associated piping utilized at the property. Soil, groundwater and surface water impacts in the vicinity of the former AST and associated piping were delineated and remediation activities were performed to address impacted soil, groundwater and surface water. The NCRWQCB approved NFA for this case on October 26, 2010.

7.2.4 California Redwood Company Property (Map ID-6)

The CRC property was listed in two databases searched by EDR; the National Pollutant Discharge Elimination System (NPDES) and the Humboldt County Division of Environmental Health (HCDEH) CUPA program. GHD interviewed HCDEH staff (Norm Crawford) regarding the CRC property CUPA listing, according to the HCDEH, the CRC property is not currently active in the CUPA program.

Review of historical aerial photographs and site reconnaissance indicates that portions of the CRC property were formerly tidal flats and have been filled. Research completed during preparation of this ISA did not identify the source of fill material in this portion of this Project segment and its origin is unknown. As the source of the fill materials are unknown and historical development of this parcel appears to be industrial, there is the potential for soil and groundwater impacts in the vicinity, and

downgradient of, fill materials on this property. Fill materials encountered within this portion of the Project may include wood debris from treated lumber.

Impacts to soil and groundwater are not documented on this property; however, given the historical use as a saw mill, there is the potential for COCs to be present in site soil and groundwater. Historical aerial photography reviewed in conjunction with this ISA indicate that the CRC was utilized as a former sawmill.

Due to the lack of information regarding soil and groundwater quality with respect to petroleum hydrocarbons, SVOCs, chlorinated solvents, and metals at the CRC property, there is the potential to encounter impacted soil and groundwater in this portion of the Project.

7.3 Hazard Rank 3

A site assigned a hazard rank of three is not known to be contaminated, but due to current or historical use, has the potential for soil and groundwater contamination that could affect Project construction. The two properties with a hazard rank of three, APN 002-231-012 (Map ID-4) and the former Northwestern Pacific Railroad (Map ID-1), were not identified in the EDR database review or on the SWRCB Geotracker website. These two properties were assigned a hazard rank of three based on observations during the site reconnaissance and review of aerial photography and Sanborn Maps.

7.3.1 Former Northwestern Pacific Railroad (Map ID-1)

The Project segments are located on or immediately adjacent to the former Northwestern Pacific Railroad corridor (now owned and occupied by NCRA). Railroad ROWs in other areas of California have typically been found to contain heavy metals, petroleum hydrocarbons, creosote, chlorinated compounds, pesticides, and polychlorinated biphenyls (PCBs) in soil and/or groundwater. As such, there is the potential for soil and groundwater impacts in the vicinity, and down-gradient of the current NCRA corridor which is included in this Project segment.

7.3.2 APN 002-231-012 (Map ID-4)

Documented releases of contaminants to soil and groundwater on this property were not identified in the research completed for this ISA. Review of historical aerial photograph and site reconnaissance indicates that the northern and eastern portions of Map ID-4 were formerly tidal flats and have been filled. Research completed during preparation of this ISA did not identify the source of fill material in this portion of this Project segment and its origin is unknown. As the source of the fill materials is unknown and historical development of this parcel appears to be industrial, there is the potential for soil and groundwater impacts in the vicinity, and down-gradient of, fill materials on this property. Fill materials encountered within this portion of the Project may include wood debris from treated lumber.

7.3.3 Bracut Industrial Park (Map ID-7)

The Bracut Industrial Park property was listed in several databases searched by EDR and documents the presence of four historical underground storage tanks (USTs) at this property. GHD interviewed HCDEH staff regarding the UST listing. HCDEH staff was not aware of the removal of

these USTs or whether an assessment of soil and groundwater quality in the vicinity of the USTs was completed. Impacts to soil and groundwater are not documented on this property; however, given the historical use as a saw mill and the presence of former USTs, there is the potential for COCs to be present in site soil and groundwater.

Review of historical aerial photographs and observations during the site reconnaissance indicates that portions of the Bracut Industrial Park property were formerly tidal flats and have been filled. Research completed during preparation of this ISA did not identify the source of fill material in this portion of this Project segment and its origin is unknown. As the source of the fill materials are unknown and historical development of this parcel appears to be industrial, there is the potential for soil and groundwater impacts in the vicinity, and downgradient of, fill materials on this property. Fill materials encountered within this portion of the Project may include wood debris from treated lumber.

Historical aerial photography and Sanborn Maps reviewed in conjunction with this ISA indicate that the Bracut Industrial Park property was utilized by the Arcata Redwood Company, as a former sawmill. Two teepee burners, located in the northern and central portions of the property were visible in historical aerial photography. Due to the lack of information regarding soil and groundwater quality with respect to petroleum hydrocarbons, SVOCs, chlorinated solvents, dioxins and furans, and metals at the CRC property, there is the potential to encounter impacted soil and groundwater in this portion of the Project.

7.3.4 US Highway 101

The Project alignment is located immediately adjacent to Highway 101 which currently and historically has been used for vehicular traffic since its development in the late 1950s/early 1960s. Historically, elevated concentrations of lead have been documented adjacent to roadways with high traffic vehicular use. Due to the proximity of the project area to Highway 101, aerially deposited lead (ADL) may have impacted soils in the immediate vicinity of the roadway. As the project is located immediately adjacent to Highway 101, there is the potential for ADL.

8. Potential Construction Impacts

This ISA identified evidence that soil and groundwater impacts from historical activities (mill operations and industrial land uses and areas of fill materials of unknown origins) and documented petroleum hydrocarbon and SVOC releases may have the potential to be present at seven locations (see Figures 2-1 through 2-5 and Table 1 for locations and constituents of concern) within, or adjacent to, the Project alignment, as follows: (Hazard Rank definitions are discussed in Section 1.2.1).

TABLE B: Potential Construction Impacts

Site	Hazard Rank	GHD Map ID
North Coast Railroad Authority Corridor	3	1
Pepsi Cola Bottling Company	2	2
Target	2	3
APN 002-231-012	3	4
Former Redwood Oil Bulk Plant	2	5
California Redwood Company	2	6
Bracut Industrial Park	3	7
Highway 101	3	---

8.1 Soil Impacts

Project construction requires excavating and filling. Soil potentially impacted with the following constituents of concern (COCs); petroleum and chlorinated hydrocarbons, SVOCs, PCP, pesticides, herbicides, PCBs, metals, creosote, dioxins, and furans may be encountered within portions of the Project alignment in areas of sites with hazard ranks of two, or three. There is the potential for unknown types of fill that may contain buried wood and concrete waste from former lumber mills, petroleum plants, a repair shop, a foundry, and general industrial facilities. These sites are identified on Figures 2-1 through 2-5 and Table 1. Table 1 lists potential COCs that may be encountered at each site based on the historical research and site reconnaissance completed for this ISA.

Soil boings for collection of samples for laboratory analysis and preparation of a Construction SGMP prior to implementation of construction activities is recommended to proactively manage potentially impacted soil in areas of the Project alignment that are within or adjacent to sites with hazard ranks of two or three. Pre-characterization soil borings are recommended in areas where soil will be disturbed by grading and excavation activities in areas of the Project alignment within or adjacent to sites with hazard ranks two, or three.

Soil boings for collection of samples for laboratory analysis prior to construction is recommended for potential ADL impacts. If soil is characterized as impacted by ADL, preparation of a Construction SGMP prior to implementation of construction activities is recommended to proactively manage potentially ADL impacted soil in areas of the Project alignment that are within or adjacent to Highway 101. Pre-characterization soil borings are recommended in areas where soil will be disturbed by grading and excavation activities in areas of the Project alignment within or adjacent to Highway 101.

In order to assess soil impacts, it is recommended that surficial and depth discrete samples be collected to the proposed depth of excavation in the areas along the Project alignment where ground disturbing activities are proposed. Potential COCs for each site within the Project alignment vary. Potential COCs for each of the seven sites identified are identified in Table 1. Once the areas of ground disturbance are confirmed, GHD recommends preparation of a workplan which identifies potential COCs for laboratory analysis, location, and number of borings necessary for pre-characterization and depths for sample collection.

Field screening during construction to identify potentially impacted soil is recommended in areas of the Project alignment that are within or adjacent to sites with hazard ranks of two or three. If impacted soil is encountered during construction activities, measures such as soil sample collection, laboratory analysis, stockpiling, impacted soil segregation and manifested disposal may be necessary. Fill materials may be encountered within or adjacent to sites with a hazard rank of three where historical activities and site reconnaissance suggest that areas within or adjacent to the Project alignment were filled. Fill materials may include wood debris from treated lumber. If fill materials are encountered, characterization of wood debris, chips, or logs should be completed prior to disposal at a facility licensed to accept the waste material as characterized.

8.2 Groundwater Impacts

Groundwater is expected to be encountered during construction activities and excavation dewatering. The extent of groundwater encountered will depend on the time of year the construction takes place and whether directional drilling or open trenching techniques are used. Groundwater pumped from excavations may be impacted by the following COCs; petroleum and chlorinated hydrocarbons, SVOCs, PCP, pesticides, herbicides, PCBs, metals, dioxins, and furans in areas of the Project alignment within or adjacent to sites with hazard ranks of two, or three. Field screening during construction activities in the areas of the Project alignment within or adjacent to sites with hazard ranks of two or three is recommended to identify potential impacts.

Soil boings for collection of groundwater samples for laboratory analysis and preparation of a Construction SGMP prior to implementation of construction activities is recommended to proactively manage potentially impacted soil and groundwater in areas of the Project alignment within or adjacent to sites with hazard ranks of two or three. Soil boings for collection of samples for laboratory analysis and preparation of a Construction SGMP prior to implementation of construction activities is recommended to proactively manage potentially impacted soil within or adjacent to sites with hazard ranks of two or three. Pre-characterization soil borings are recommended in areas where groundwater will be encountered within or adjacent to sites with hazard ranks of two or three. Potential COCs for each site within the Project alignment vary. Potential COCs for each of the seven sites identified in this ISA are identified in Table 1.

If ADL impacted soil is at a depth in close proximity to groundwater or at elevated concentrations, groundwater may be potentially impacted by ADL. Groundwater pumped from excavations may be impacted by ADL in areas of the Project alignment within or adjacent to sites with Highway 101. Field screening during construction activities in the areas of the Project alignment within or adjacent to sites with hazard ranks of one, two, or three is recommended to identify potential impacts.

If necessary, in order to address potential ADL groundwater impacts, pre-construction characterization for lead in groundwater is recommended. Groundwater is recommended for pre-construction characterization if laboratory analysis of pre-construction soil borings indicate elevated total and STLC concentrations of 1,000 ppm and 5 mg/L, respectively.

Once the areas of potential dewatering are confirmed, GHD recommends preparation of a workplan which identifies potential COCs for laboratory analysis, location, and number of borings necessary for pre-characterization and depth for sample collection. If impacted groundwater is encountered,

analytical services would be necessary to quantify the potential impacts. Impacted groundwater may require special handling and treatment prior to disposal.

9. Conclusions

It is assumed that soil disturbance and dewatering is planned for several areas within the Project segments. Groundwater is less than four feet bgs within the Project alignment and should be expected to be encountered during construction, particularly in spring and early summer. Impacted soil and groundwater is potentially anticipated to be encountered within the Project if soil disturbance occurs within or adjacent to the sites with hazard rankings of two or three. ADL impacted soil may potentially be encountered within the Project for soil disturbance within or adjacent to Highway 101. If ADL impacted soil is at a depth in close proximity to groundwater or at elevated concentrations, groundwater may be potentially impacted by ADL. The seven sites discussed within this ISA with hazard rankings of two or three are detailed in Table 1 (attached) and Figure 2. Table 1 lists potential COCs that may be encountered at each site based on historical research and site reconnaissance completed for this ISA.

Construction workers have the potential to be exposed to hazardous contaminants. Earthmoving activities or driving on dry exposed soil may expose workers to dust containing contaminants. Impacted soil and groundwater encountered should be sampled and characterized for off-site disposal. Encountered buried wood waste or debris should be separated from soil and characterized for any off-site disposal.

Groundwater pumped from excavations within or adjacent to sites with a hazard rank of two or three or within or adjacent to Highway 101 should be sampled and laboratory analyzed prior to construction with potential for treatment prior to disposal. If soil and/or groundwater impacts are identified, it is recommended that site workers involved in excavation activities be Hazardous Waste Operations and Emergency Response (HAZWOPER) trained (Occupational Safety and Health Administration [OSHA] 1910.120).

10. Recommendations

The purpose of this ISA was to identify areas of potentially impacted soil and/or groundwater along the Project alignment that may require special handling and disposal during construction or could pose a health exposure risk to construction workers. This ISA identified evidence that soil and groundwater impacts from historical activities (highway with high traffic vehicular use) and documented petroleum hydrocarbon releases may have the potential to be present at two locations (see Figure 2 and Table 1 for locations and constituents of concern) within, or adjacent to, the Project alignment. In areas of ground disturbance, a Preliminary Site Investigation (PSI) that includes pre-construction soil borings is recommended in order to characterize soil and groundwater in anticipation of implementation of construction activities. Once the areas of ground disturbance and potential dewatering are confirmed, GHD recommends preparation of a PSI Workplan which identifies potential COCs for laboratory analysis, location, and number of borings necessary for pre-characterization, and depth for sample collection.

Laboratory analytical results of soil and groundwater samples collected from the borings shall be utilized to ascertain whether health and safety concerns are present for construction workers and determine potential soil and/or groundwater handling and disposal options. Proposed soil borings and/or grab groundwater sample locations shall be determined following identification of the areas and depths of soil excavation and dewatering activities. In order to proactively manage potentially impacted soil and groundwater which may be encountered during construction, preparation of a Construction SGMP is recommended.

If soil and/or groundwater impacts are identified, it is recommended that site workers involved in excavation activities be Hazardous Waste Operations and Emergency Response (HAZWOPER) trained (Occupational Safety and Health Administration [OSHA] 1910.120).

11. Special Terms and Conditions

Professional judgment was exercised in gathering the information obtained and GHD is committed to the usual care, thoroughness and competence being practiced in the engineering profession at the time this work was performed. No investigative method can completely eliminate the possibility of obtaining partially imprecise or incomplete information. Conclusions were based on the best information available during the period of the investigation and within the scope of services prescribed in our Agreement. Thus, GHD cannot guarantee that the investigation completely defines the potential for any contamination by hazardous or otherwise harmful substances described in this report or, if no such contamination is found, its absolute absence.

This report is not a legal opinion. It does not necessarily comply with requirements defined in any environmental law such as the “due diligence inquiry.” Only legal counsel retained by the Humboldt County Department of Public Works is competent to assess the legal implications of any information or conclusions in this report. This report was prepared for the exclusive use by the Humboldt County Department of Public Works. GHD is not liable for actions arising out of the reliance of any third party on the information contained within this report.

Table 1.
Summary of Identified Sites
Humboldt Bay Trail South

GHD Map ID	Site Name	Site Address	Contaminants of Concern	Details of Contamination, Media, Extent, Concentrations, etc.	Groundwater Depth/ Direction	Hazard Rank
1	Former Northwestern Pacific Railroad Corridor	---	Petroleum hydrocarbons, metals, pesticides, herbicides, and SVOCs	Railroad rights-of-ways in other areas of California have typically been found to contain heavy metals, petroleum hydrocarbons, creosote, chlorinated compounds, pesticides and polychlorinated biphenyls (PCBs) in soil and/or groundwater. As such, there is the potential for soil and groundwater impacts in the vicinity, and downgradient of the current NCRA corridor which is included in the Project segments.	Unknown	3
2	Pepsi Cola Bottling Group	2433 Second Street	Gasoline and BTEX	Based on information contained in the NCRWQCB case file and on the SWRCB Geotracker website, soil and groundwater quality was impacted by a release of petroleum hydrocarbons from a former AST and associated piping utilized at the property. Soil, groundwater and surface water impacts in the vicinity of the former AST and associated piping were delineated and remediation activities were performed (soil excavation, in-situ bioremediation and sheet pile installation [along southeastern property boundary]) to address impacted soil, groundwater and surface water. The NCRWQCB approved NFA for this case on December 19, 2011. A SGMP is on file with the NCRWQCB and indicates that residual soil and groundwater impacts are present in the central, southeastern and eastern portions of the Pepsi property.	Approximately less than one foot bgs in the winter (highest recorded) in an east-southeasterly direction.	2
3	Target	2525 Fourth Street	Diesel, petroleum hydrocarbons, BTEX, and SVOCs	According to the information on file at the NCRWQCB, this site was developed in 1963 on vacant tide land. Montgomery Wards, a retail store with automotive repair services formerly utilized this site for commercial operations. The former Montgomery Wards automotive shop included one waste oil tank, five hydraulic hoists and one oil/water separator. Petroleum hydrocarbon impacts to soil and groundwater were identified in the north-central portion of this property (Map ID-9). The NCRWQCB concurred with NFA for the two cases on August 27, 2007. Additional information present in the NCRWQCB file for this case documents a release of SVOCs including dioxins and furans in the eastern portion of the property, immediately west of the existing Target Trail. Information regarding the source of the SVOC impacted soil and evidence of delineation in the eastern direction (towards the existing Target Trail Project segment) was not present in the NCRWQCB case files. SVOC impacted soil was remediated as a 'hot spot' excavation to the satisfaction of the NCRWQCB in 2005. Information regarding soil and groundwater quality in the area of the existing Target Trail project segment was not present in the NCRWQCB case file. As COCs were identified in the eastern portion of this property and the potential source of SVOCs in soil was not identified, there is the potential for impacted soil and groundwater to be present within this portion of the Project.	Approximately less than one foot bgs in an easterly direction.	2
4	APN 002-231-012	---	Petroleum hydrocarbons, metals, and SVOCs	Documented releases of COCs to soil and groundwater on this property were not identified in the research completed for this Corridor Study. Review of historical aerial photographs and site reconnaissance indicates that the northern and eastern portions of Map ID-4 were formerly tide flats and have been filled with various materials (soil, concrete, wood and other miscellaneous construction/building debris). Research completed during preparation of this Corridor study did not identify the source of fill material in this portion of this Project segment and its origin is unknown. As the source of the fill materials are unknown and historical development of this parcel appears to be industrial, there is the potential for soil and groundwater impacts in the vicinity, and downgradient of, fill materials on this property.	Unknown	3
5	Former Redwood Oil Bulk Plant	105 X Street	Petroleum Hydrocarbons- Gasoline	The Former Redwood Oil Bulk Plant site is located at 105 X Street and is further identified as NCRWQCB Case Number 1NHU751. This property is located immediately south of the southern-most extent of the Project and abuts Segment 1A. Based on information available on the SWRCB Geotracker website, soil and groundwater quality was impacted by a release of petroleum hydrocarbons from former ASTs and associated piping utilized at the property. Soil, groundwater and surface water impacts in the vicinity of the former AST and associated piping were delineated and remediation activities were performed to address impacted soil, groundwater and surface water. The NCRWQCB approved NFA for this case on October 26, 2010.	Unknown	2

Table 1.
Summary of Identified Sites
Humboldt Bay Trail South

GHD Map ID	Site Name	Site Address	Contaminants of Concern	Details of Contamination, Media, Extent, Concentrations, etc.	Groundwater Depth/ Direction	Hazard Rank
6	California Redwood Company	---	Petroleum hydrocarbons, metals, pesticides, herbicides, and SVOCs	The CRC property was listed in two databases searched by EDR; the National Pollutant Discharge Elimination System (NPDES) and the Humboldt County Division of Environmental Health (HCDEH) CUPA program. Impacts to soil and groundwater are not documented on this property, however, given the historical use as a sawmill, there is the potential for COCs to be present in site soil and groundwater.	Unknown	2
7	Bracut Industrial Park	---	Petroleum hydrocarbons, metals, pesticides, herbicides, dioxins/furans, and SVOCs	The Bracut Industrial Park property was listed in several databases searched by EDR and documents the present of four historic underground storage tanks (USTs) at this property. GHD interviewed HCDEH staff regarding the UST listing. HCDEH staff was not aware of the removal of these USTs or whether an assessment of soil and groundwater quality in the vicinity of the USTs was completed. Impacts to soil and groundwater are not documented on this property, however, given the historical use as a sawmill and the presence of former USTs, there is the potential for COCs to be present in site soil and groundwater.	Unknown	3
---	State Highway 101	---	Lead	The Project alignment is located immediately adjacent to State Highway 101 which currently and historically has been used for vehicular traffic since its development in the late 1950s/early 1960s. Historically, elevated concentrations of lead have been documented adjacent to roadways with high traffic vehicular use. Due to the proximity of the project area to State Highway 101, aerially deposited lead (ADL) may have impacted soils in the immediate vicinity of the roadway. As the project is located immediately adjacent to State Highway 101, there is the potential for ADL.	Unknown	3

Notes:
ID= Identification
BTEX = benzene, toluene, ethylbenzene, and xylenes.
Methyl tert butyl ether = MTBE
ppb = parts per billion
bgs = below the ground surface
LUST = leaking underground storage tank
VOCs = volatile organic compounds
µg/L = micrograms per liter
UST = underground storage tank
AST = above ground storage tank

Hazard Rank:

(1) A site that will affect Project construction. Contamination of soil and/or groundwater is confirmed to be within the Project alignment.

(2) A site with the potential to affect the Project, either because of the presence of contamination that may likely migrate into the Project area or because the extent of contamination is unknown.

(3) A site that is not known to be contaminated, but due to current or historical use could possibly have contamination that could affect Project construction.

(4) A site that has little or no potential to affect the Project.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS site within the searched area.

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS-ARCHIVE site within the searched area.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 10 RCRA-SQG sites within the searched area.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-CESQG site within the searched area.

EXECUTIVE SUMMARY

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 37 CUPA Listings sites within the searched area.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2015 has revealed that there are 9 HAZNET sites within the searched area.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2017 has revealed that there are 4 ENVIROSTOR sites within the searched area.

HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the HWT list, as provided by EDR, and dated 04/11/2017 has revealed that there is 1 HWT site within the searched area.

EDR PROPRIETARY RECORDS

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within the searched area.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within the searched area.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within the searched area.

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there is 1 RGA LUST site within the searched area.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110064261999

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

CRC - BRAINARD (Continued) **1016159475**

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: Yes
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:
Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Historical Generators:
Date form received by agency: 11/12/2015
Site name: BIO WASTE RESOURCES LLC
Classification: Not a generator, verified

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

BIO WASTE RESOURCES LLC (Continued) **1017785818**

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F004
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F010
. Waste name: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F011
. Waste name: SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.

. Waste code: F012

BIO WASTE RESOURCES LLC (Continued) **1017785818**

. Waste name: QUENCHING WASTEWATER TREATMENT SLUDGES FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

. Waste code: F020
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- OR TETRACHLOROPHENOL OR OF INTERMEDIATES USED TO PRODUCE THEIR PESTICIDE DERIVATIVES. (THIS LISTING DOES NOT INCLUDE WASTES FROM THE PRODUCTION OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

. Waste code: F021
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF PENTACHLOROPHENOL, OR OF INTERMEDIATES USED TO PRODUCE DERIVATIVES.

. Waste code: F022
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENES UNDER ALKALINE CONDITIONS.

. Waste code: F023
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- AND TETRACHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE WASTES FROM EQUIPMENT USED ONLY FOR THE PRODUCTION OR USE OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

. Waste code: F024
. Waste name: PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)

. Waste code: F025
. Waste name: CONDENSED LIGHT ENDS, SPENT FILTERS AND FILTER AIDS, AND SPENT DESICCANT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION.

. Waste code: F026

BIO WASTE RESOURCES LLC (Continued) **1017785818**

. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENE UNDER ALKALINE CONDITIONS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: F028
. Waste name: RESIDUES RESULTING FROM THE INCINERATION OR THERMAL TREATMENT OF SOIL CONTAMINATED WITH EPA HAZARDOUS WASTE NOS. F020, F021, F022, F023, F026, AND F027.

. Waste code: F032
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

. Waste code: F034
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F035
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F037
. Waste name: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE

BIO WASTE RESOURCES LLC (Continued) **1017785818**

BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F038
. Waste name: PETROLEUM REFINERY SECONDARY (EMULSIFIED) OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE AND/OR FLOAT GENERATED FROM THE PHYSICAL AND/OR CHEMICAL SEPARATION OF OIL/WATER/SOLIDS IN PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH WASTES INCLUDE, BUT ARE NOT LIMITED TO, ALL SLUDGES AND FLOATS GENERATED IN INDUCED AIR FLOTATION (IAF) UNITS, TANKS AND IMPOUNDMENTS, AND ALL SLUDGES GENERATED IN DAF UNITS. SLUDGES GENERATED IN STORMWATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND F037, K048, AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F039
. Waste name: LEACHATE RESULTING FROM THE TREATMENT, STORAGE, OR DISPOSAL OF WASTES CLASSIFIED BY MORE THAN ONE WASTE CODE UNDER SUBPART D, OR FROM A MIXTURE OF WASTES CLASSIFIED UNDER SUBPARTS C AND D OF THIS PART. (LEACHATE RESULTING FROM THE MANAGEMENT OF ONE OR MORE OF THE FOLLOWING EPA HAZARDOUS WASTES AND NO OTHER HAZARDOUS WASTES RETAINS ITS HAZARDOUS WASTE CODE(S): F020, F021, F022, F023, F026, F027, AND/OR F028.)

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P002
. Waste name: 1-ACETYL-2-THIOUREA (OR) ACETAMIDE, N-(AMINOTHIOXOMETHYL)-

. Waste code: P003
. Waste name: 2-PROPENAL (OR) ACROLEIN

. Waste code: P004
. Waste name: 1,4,5,8-DIMETHANONAPHTHALENE, 1,2,3,4,10,10-HEXA-CHLORO-1,4,4A,5,8,8A,-HEXAHYDRO-, (1ALPHA, 4ALPHA, 4ABETA, 5ALPHA, 8ALPHA, 8ABETA)- (OR) ALDRIN

. Waste code: P005

Alias Comments: Not reported

Site Description: Site has significant contamination and is located adjacent to Humboldt Bay and sensitive environments. Removal action is being considered by the RWQCB. J. Johnson DTSC comment: The site is currently under the lead of the Regional Water Quality Control Board, Northcoast Division. Further cleanup and abatement activities will occur, pending the completion of a Feasibility Study, assessing the remedial alternatives.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WDS:
Facility ID: 1 12I010173
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 1
Facility Telephone: Not reported
Facility Contact: BOB FOX
Agency Name: JOHNS USED CARS AND WRECKERS
Agency Address: 3008 JACOBS AVE
Agency City,St,Zip: EUREKA 95501
Agency Contact: BOB FOX
Agency Telephone: Not reported
Agency Type: Private
SIC Code: 5015
SIC Code 2: Not reported
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

SIC Code:	7353
SIC Code 2:	Not reported
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:

Registry ID: 110002846975

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002623199

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/05/2017

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017
Date Data Arrived at EDR: 04/21/2017

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017
Date Data Arrived at EDR: 04/19/2017
Date Made Active in Reports: 05/05/2017
Number of Days to Update: 16

Source: EPA
Telephone: 800-424-9346
Last EDR Contact: 04/21/2017
Next Scheduled EDR Contact: 07/31/2017
Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 02/07/2017
Date Data Arrived at EDR: 04/19/2017
Date Made Active in Reports: 05/05/2017

Next Scheduled EDR Contact: 07/31/2017
Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014
Date Data Arrived at EDR: 03/18/2014

Data Release Frequency: Quarterly

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016
Date Data Arrived at EDR: 12/28/2016

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/30/2016

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there are 2 SLIC sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
BRACUTT SAWMILL	HIGHWAY 101	S 1/8 - 1/4 (0.176 mi.)	B4	9
Database: SLIC REG 1, Date of Government Version: 04/03/2003 Facility Id: 1NHU312				
CASH-AND-CARRY	6700 HIGHWAY 101, NO	S 1/8 - 1/4 (0.246 mi.)	B6	10
Database: SLIC REG 1, Date of Government Version: 04/03/2003 Database: SLIC, Date of Government Version: 06/12/2017 Facility Status: Completed - Case Closed Facility Id: 1NHU530 Global Id: T0602393358				

State and tribal registered storage tank lists

AST: A listing of aboveground storage tank petroleum storage tank locations.

A review of the AST list, as provided by EDR, and dated 07/06/2016 has revealed that there is 1 AST site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CITY OF ARCATA - SEW	601 S G ST	NNW 1/8 - 1/4 (0.142 mi.)	A2	8

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 2 CUPA Listings sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CITY OF ARCATA - SEW	601 S G ST	NNW 1/8 - 1/4 (0.142 mi.)	A3	8

Local Site Id: FA0000652

CASH & CARRY # 546 | 6700 N US HIGHWAY 10 | S 1/8 - 1/4 (0.246 mi.) | B5 | 10
Database: CUPA HUMBOLDT, Date of Government Version: 03/20/2017
Permit Status: 01 - Active
Permit Status: 02 - Inactive
Local Site Id: FA0005284

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/19/2017

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Elevation:	5 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5609276 ARCATA SOUTH, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

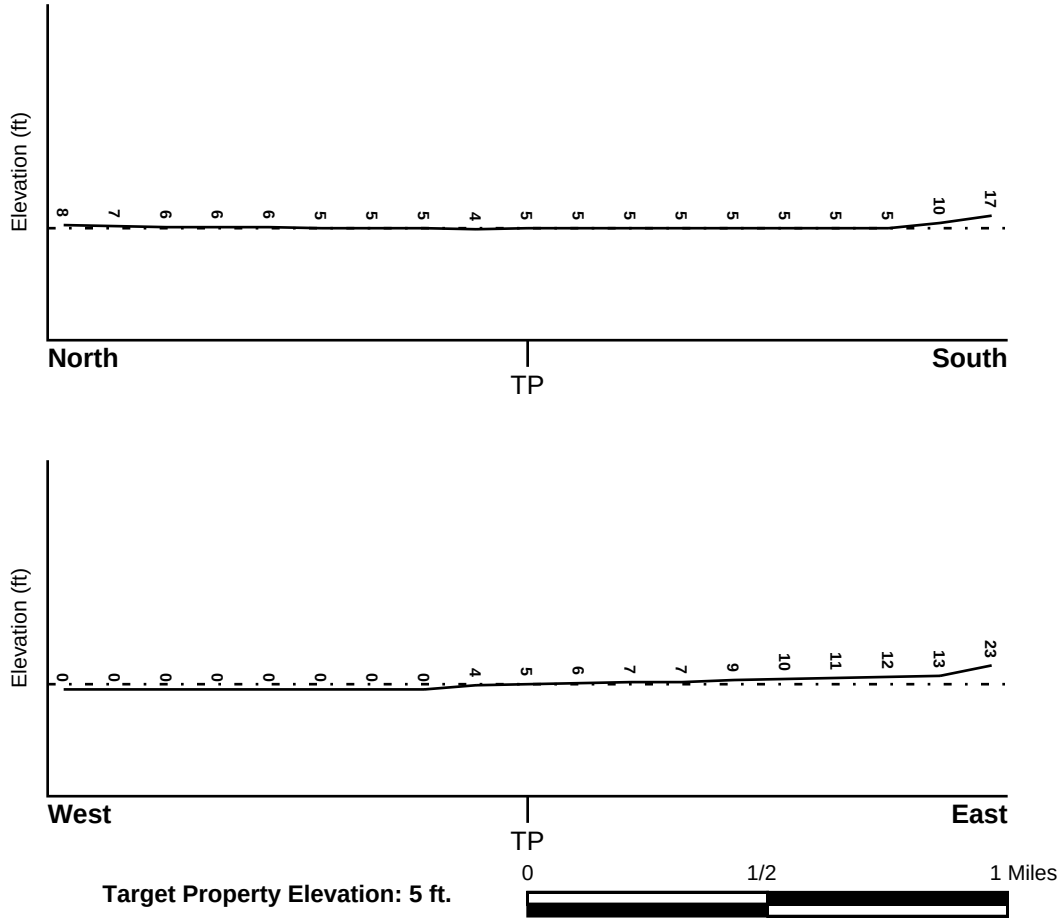
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
0600600780B	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type

0600610004D	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ARCATA SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	FERNDALE
Soil Surface Texture:	silt loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	21 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 6.60
2	21 inches	61 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.40
3	61 inches	80 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Surficial Soil Types: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sandy clay loam
stratified
silty clay loam
sand
silt loam
coarse sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Contact: Anna Gower

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GHD Inc. were identified for the years listed below (selected maps only*). The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GHD Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:
