

SHELTER COVE Tsunami Hazard Map

This map shows the tsunami hazard zones in and around Shelter Cove. Areas shaded yellow are at risk of flooding during a tsunami, including Black Sands Beach, Shelter Cove's beach areas, the marina and boat launch, the lower parts of Beach Rd., Lower Pacific Dr. and low-lying areas along the shoreline near the airport. Areas shaded green are outside the tsunami hazard zone and considered safe, including most of the residential neighborhoods on higher ground, the airport runway and upland areas east of Shelter Cove Rd. No schools are in the hazard zone. If you are in a yellow hazard zone during a tsunami warning, move inland and uphill on foot toward the green safe areas.
