

TRINIDAD

Tsunami Hazard Map

This map shows the tsunami hazard zones in and around Trinidad. Areas shaded yellow are at risk of flooding during a tsunami, including Trinidad State Beach, College Cove, Trinidad Harbor, the shoreline near the Trinidad Pier and low-lying areas along Scenic Dr. Areas shaded green are outside the tsunami hazard zone and considered safe, including most of Trinidad, Patrick’s Point Dr., Trinidad Rancheria, and Trinidad Head. No schools are in the hazard zone. If you are in a yellow hazard zone during a tsunami warning, move inland and uphill on foot toward the green safe areas.
