

FAIRHAVEN & NORTH SPIT
Tsunami Hazard Map

Tsunami Zone → Safe Area
 If you feel an earthquake, go to safe area

0 1 Miles
 August 2020

This map shows the tsunami hazard zones in and around Fairhaven and the North Spit of Humboldt Bay. Areas shaded yellow are at risk of flooding during a tsunami, including all of Fairhaven, the Samoa Bridge approach, the US Coast Guard Station, the Samoa Dunes Recreation Area, and low-lying areas along the North Spit and western shoreline of Humboldt Bay. Areas shaded green are outside the tsunami hazard zone and considered safe, including the higher ground dunes near Bay St. and Vance Ave and the higher ground dunes near New Navy Base Rd. and Lincoln Rd. If you are in a yellow hazard zone during a tsunami warning, move inland and uphill on foot toward the green safe areas.
